"My Harry seems so happy over there—when the announcer said 'would you like to say a few words to the little woman back home'—he just laughed and laughed—"

World's Week

BY HAROLD L. WEIR
Associate Editor and Daily Columnist of The Edmonton Bulletin

The creation of an American military protectorate in Iceland means, in the eyes of the Allies, that the North Atlantic has become an Anglo-American lake, that the United States is now prepared to fight in the extended Western Hemisphere and that Germany is finally confronted by the immediate possibility of a clash with the air, sea and land forces of one of the most powerful and wealthy nations on earth.

Harold L. Weir

It works out this way: The establishment of a corps of American troops on Iceland means that the United States is prepared to fight to maintain those troops there for the duration, come what may. That, in turn, means that the United States is prepared to maintain a sea lane between the American coast and Iceland's capital. And that means that the American navy is prepared to sink any hostile raiders and submarines that may be encountered in that stretch of water.

The maintenance of an American force in Iceland also implies protection both of sea lanes and of Iceland itself by the American army, and air force, and that means that any long distance German raider sweeping out of Brest or Stavanger or any other German base will be subject to attack.

In other words, all the instruments of destruction which are now being employed by the Germans in the Battle of the Atlantic will, henceforth be confronted by the joint forces of Great Britain and the United States.

Thus, so far as the North Atlantic is concerned, the United States is defensively at war just as she has been defensively at war in the Western Hemisphere ever since she assumed control of certain British bases there.

Continued on Page 4, Col. 2

WEDDING

BLOUGH — WALL

The Baptist Church in Crossfield was the scene of a pretty wedding this afternoon, July 17th, at five o'clock, when Esther Bertha, second daughter of Mr. and Mrs. H. J. Wall, of Didsbury, became the bride of Mr. Berton R. Blough, second son of Mrs. Myrtle A. Blough of Crossfield. Rev. D. G. Milligan, pastor of the Church, performed the ceremony. The church was suitably decorated with fern and white gladioli.

The bride, beautifully attired in a floor length gown of white sheer and a picture hat, carrying a bouquet of white sweet peas and pink carnations, entered the church on the arm of her father to the strains of the Wedding March from Lohengrin played by Miss Ruth Strauffer. The bridesmaid, Miss Opal Blough, sister of the groom, wore a gown of dusky rose with matching hat and a corsage of sweet peas. Mr. C. E. Wall, brother of the bride, attended the groom.

During the signing of the register Mr. G. E. Wall, brother of the bride, sang, "Love Never Falteth". Immediately after the ceremony the bridal party motored to the home of the bride's parents, where a buffet supper was served. Mrs. Wall, choosing a redingote in navy blue sheer with matching accessories and a corsage of red roses, and Mrs. Blough, wearing a flowered blue sheer with matching accessories and corsage of yellow roses, welcomed the guests at the reception. Sweet peas adorned the bride's table which was centred with a three-tier wedding cake and lighted by pink candles. Miss Hattie Law poured tea.

After a short honeymoon the happy couple will reside in Crossfield.

Mr. G. Law, Didsbury photographer, was among the guests and took a number of pictures.

Buy War Savings Certificates

LOCALS

Pte. J. Hatton spent leave here this week with his wife and family.

O. E. Jones has purchased a new Massey Harris tractor and combine from the local agent, H. McDonald.

Mr. and Mrs. W. L. Wood left this week on a motor trip to the Pacific coast.

Mrs. E. W. Hoover is spending a holiday in Pollockville and Solburg Alta.

Rev. and Mrs. S. R. Hunt, of Strathmore, were week-end visitors at the home of Mr. and Mrs. D. Yellowlees.

The heat wave prevailing for the past few days is causing rapid deterioration of the crops and rain is needed immediately.

Mr. and Mrs. W. A. Hurt and Mr. and Mrs. W. G. Landymore left this week on a holiday trip to Vancouver.

Mrs. Hepworth and daughter, Helen, of Bonners Ferry, Idaho, are spending a holiday here, the guests of Mrs. Hepworth's parents, Mr. and Mrs. S. Willis.

Harold Mair, who has been in training camp at Camrose, has received his call to the Navy and reported to Crossfield for duty this morning.

Work has been completed on the alterations and improvements to the local Baptist Church. A vestibule has been added and the basement enlarged and cemented.

Mr. and Mrs. Eric Hopkins leave tomorrow for a two weeks' holiday trip in the mountains. They are going by car and trailer and will visit Banff, Jasper and the Columbia Icefields.

Rev. H. V. Ellison and Joe, accompanied by Eldon McCrimmon and George Archibald, leave on Saturday for Camp Niaski, Lake Chiniki, Morley, Alta., where Mr. Ellison is on the camp staff.

Among those from Crossfield attending the funeral service of the late Sam Lee in Calgary last Sunday were: Mr. and Mrs. Huston and family, Messrs C. C. Stafford, Ivor Lewis, T. Tredaway, Ed. Meyers and Joe Demers.

Madden is to have a new United Church this summer, excavation for the basement having been started on Tuesday of this week.

Work is also underway on building another room on Madden school.

A picnic was held at the home of Mr. and Mrs. Frank Collicutt of Willow Spring Ranch last Sunday, by the directors of the Calgary Stampede, in honor of Mr. and Mrs. E. L. Richardson and J. Chas. Yule.

Mr. Ed. Fox has returned from a holiday at the coast. Mrs. Fox and Mervin, Mrs. Chas. Fox and Gordon remained out there and were joined by Mr. Chas. Fox for the balance of the month. Ed's return trip and Charlie's trip west were made by plane.

Funds of the local Red Cross were increased by \$5.55, when the Rifle Club turned over their surplus from the recent guessing contest. The number of shells in the jar was 4027 and John Larson, with the guess of 4010 shells, was the winner of the War Savings Certificate.

BOARD OF TRADE MEETING JULY 21ST

A meeting of the Board of Trade has been called by the President, J. Heskeith, to be held in the Dining Room of the Oliver Hotel on Monday evening, July 21, at 8:15.

The Board of Trade has done a lot of good work in the community in the past, and it is hoped there will be a large turn out at the meeting.

Village Council Meeting

The regular meeting of the Village Council was held on Friday evening, July 4, with Mayor Wood in the chair and Councillors Hurt and Baunister present.

Minutes of previous meeting were read and adopted.

The appointment of Mr. A. M. Cumming as auditor of the Village books for 1941 was approved.

Councillor George Murdoch of Rosebud municipality and M. Patmore interviewed the Council re the joint purchase of gravel for Mr. Murdoch's division and for maintenance of the village streets. After discussion, Mr. Patmore agreed to deliver gravel at 75c. per yard and gravel loaded at the pit in other trucks to be 30c. per yard.

Councillor Baunister brought up the resignation of J. D. Fike as caretaker at the cemetery and the appointment of Art. Heywood was approved.

It was decided that in future all business in connection with the cemetery be handled through the

GAS TRUCK PARTIALLY DESTROYED BY FIRE

The Crossfield Fire Department answered its first alarm of the year when called out to a burning gas truck on the highway a half mile north of town Wednesday afternoon.

The fire is believed to have started by gas leaking on the exhaust pipe and it spread so rapidly that the cab and engine were soon a blazing inferno from which the driver was fortunate to escape unhurt. The department arrived in time to save the trailer and gas tank, but the truck was a total loss. Owned by Guy MacNelly, the truck was proceeding from Edmonton to Turner Valley and was empty at the time.

Traffic had to be detoured for about two hours during the fire and until the truck could be towed from the highway.

secretary's office.

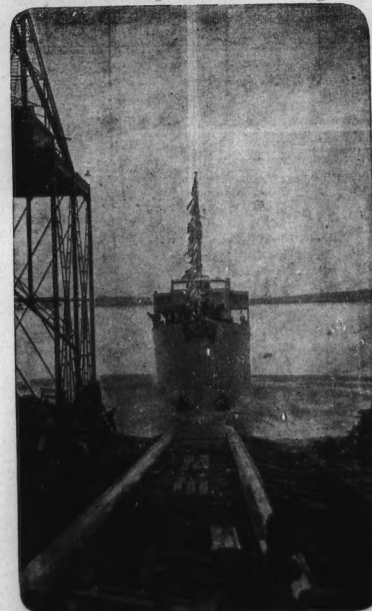

Mayor Wood stated that he had been approached by Mr. C. U. Stafford in regard to plowing the east half of the cemetery to have it in shape when required, which would be in the near future. Mr. Stafford had kindly offered his services in preparing this part of the cemetery for future use, without charge to the Village. The offer was accepted by the Council.

It was also decided that all drive-ways be marked out and a new lock be purchased for the gate.

All accounts were approved and ordered paid.

A gallon a day — Keeps Hitler away.

Canada's Navy Grows

The Dominion's latest war vessel HMCS Lachine, was launched at an Eastern Canadian Port over the week-end and is shown here slipping down the ways. Sponsored by Mrs. G. M. Hibbard, wife of Capt. G. M. Hibbard, R.C.N. director of technical division, Department of National Defence, the vessel, a minesweeper, has been officially "adopted" by the City of Lachine.

Keep This In Mind To Get Right Perspective Of Damage Done By Bombs

We look at our bomb torn cities and the damage seems appalling in its intensity. But, says the London Sunday Express, keep this fact in mind, for it will keep the perspective right — all the damage so far represents only six months' normal building work.

Before the war we were building a thousand houses a week. Today the rate of destruction is no more than equal to that, if, indeed, quite as much.

"Flattened" Fish

Fish which has been flattened and dried so that it looks like a piece of cardboard is Britain's latest device for economising in shipping space.

It is a modern version of stock-fish, which in Tudor times was exported in huge quantities from Scotland to the Catholic countries of Europe. The Spanish Armada, sailing in 1588 on its abortive attempt to invade England, carried 8,000 quintals of stock fish to feed its crews.

By the modern method, which is applied to ling and cod, much of it from Newfoundland, the fish is sliced open and the inside removed. Then, by a special vacuum process, the water is drained out until the fish is only one-third its original bulk. Packed in salt it will then keep for many weeks.

Although it does not look particularly appetizing in this form, a soaking in warm water brings it back to its original freshness. It is then boiled, fried or grilled according to taste.

A British guest child was named winner of an essay contest held in conjunction with the Banff School of Fine Arts, a project of the University Extension. Taking as her theme "How does the High School Dramatic Club help make a Better Citizen?" Miss Molly Taylor won first award. The winner of this and other contests is entitled to a free course in dramatics at the school.

Registration in both the department of education and university summer schools is progressing, but not so rapidly as was expected by officials. First meeting of the students union was held Thursday and on Friday an address was delivered to students by Prof. M. H. Long on "The United States and the World Crisis". Total registrations are expected to reach 1,500.

5 Bushel Quota Likely

According to Hon. J. A. McKinnon, Federal Minister of Trade and Commerce, it is practically certain that the minimum initial delivery quota for 1941 wheat will be five bushels an acre. "Plans are already well in hand for the crop," he said in Edmonton last week, "and in all accommodation for some 51,000,000 bushels will be provided for storage space."

RENEW ACQUAINTANCE

AT JASPER

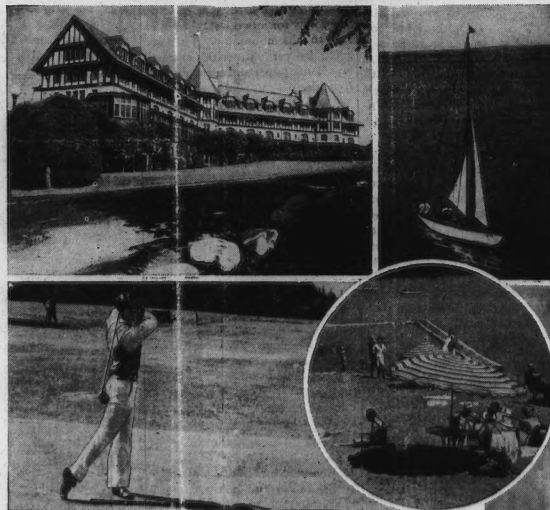

After a period of 18 years Prime Minister Mackenzie King and Charles Evans Hughes, ex-Chief Justice of the United States Supreme Court met at the latter's Jasper Park Lodge bungalow during the Prime Minister's visit to Jasper a few days ago. The last meeting was in Montreal when a discussion was held on international affairs.

The Prime Minister was particularly pleased with the number of American visitors at Jasper Park Lodge this season and wished them all a pleasant vacation. Before leaving the Lodge grounds the Prime Minister asked his companions, "Is the train still there? I hope not," but unfortunately it was still waiting to carry him on eastward.

CUT COARSE FOR THE PIPE

Where Fairways Meet the Sea

The golfer who occasionally substitutes his clubs for fishing tackle, who enjoys a brisk workout on the tennis courts, an invigorating Atlantic plunge or soothing sun-bath, who likes scudding before salt-laden breezes in a sailing craft, and has a weakness for sea-food, can satisfy all these urges, and other vacation whims as well, at the famed Algonquin Hotel at St. Andrews-by-the-Sea in old New Brunswick.

Open this year from June 25 to September 2 the charming Canadian Pacific hotel is enjoying one of the most successful seasons in its history. Tourists who formerly visited Europe in quest of vacation pleasures have found parts of the New Brunswick countryside a worthy reproduction of the Old Country, the sea-girt St. Andrews golf

course as thrilling as its famous Scottish namesake, and sheltered sandy waters as inviting as the Riviera.

Summer life at the Algonquin is a continual round of pleasure from the first dip in Katy's Cove to the final strains of the last waltz in the hotel ballroom. Its sun-drenched beaches are thronged continually with happy bathers and bronzed sun-worshippers, while the more skillful race out to diving raft, show off their newest swim dive or indulge in other forms of "aquabatics." Shivers are practically unknown at Katy's Cove, its sands absorbing the sun's heat and releasing it at high tide for the bather's benefit.

No golfer who takes his game seriously would tour the Maritimes without a visit to St. Andrews. Inspired by the bracing tang of the sea, velvety greens,

sea-girt fairways, and unusually springy turf, the golfer usually finds the 18th hole arrives all too soon and his score card shows surprising results! Many an international tourney is contested on Algonquin links, at which time the hotel guest register reads like a "Who's Who in Golfing."

Deep-sea fishing for cod, mackerel and haddock is available literally at the hotel's doorstep, while scrappy trout, bass and land-locked salmon inhabit the St. Croix Valley lakes a few miles distant. Other attractions include hiking, motorboating, cycling and boat excursions to nearby Campobello Island, site of President Roosevelt's summer home.

St. Andrews is easily accessible over Canadian Pacific lines from large centres in Eastern Canada and connecting lines in the United States.

See Us For Fine Job Printing

The World of Wheat

By H. G. L. Strange

We hear that President Roosevelt, at the request of Mr. De Valera, is proposing to ship wheat and other foodstuffs to Eire.

The ships carrying these foodstuffs would have to pass through the German submarine, bomber and surface warship blockade on the Atlantic, and so would have to be protected by British warships, but the theory of it is that this protection is rendered much more difficult than it should be, and entails a greater loss of British life and ships, because Mr. De Valera refuses to permit the British to use 3 Eire ports that by Treaty were available to Great Britain for mutual defense up to and including the year 1938.

Canada, however, is making all her ports available to Great Britain, and is spending the treasure of her people the blood of her sons in common Empire defence, where as Eire, also like Canada, a part of the British Commonwealth of Nations, spends no money, no treasures and no blood on Empire defence. It seems to me therefore that when this war is over, Great Britain should certainly give a 'buying' preference to Canadian farm products such as cattle, bacon, eggs, poultry, and cheese over those from Eire from which country Great Britain normal purchases vast quantities of these foodstuffs.

Following factors have tended to raise price: Harvesting operations in Texas, Oklahoma and Kansas indicate considerable damage to winter wheat. Oriental wheat production in 1941 is expected to be considerably lower than 1940. General European crop prospects continue poor to fair. U.S. and Canadian wholesale commodity prices continue to move upward.

Following factors have tended to lower price: The U.S. spring wheat crop continues to make excellent progress. The French North African wheat crop for 1941 is expected to reach 735 million bushels, an increase of 5.5 million over 1940. The U. S. Department of Agriculture estimates world supplies of wheat for 1941-42 as greater than 1939 record of 5,608 million bushels.

"Is Joe's car good for much speed?"

"Say, the only dust you could raise from it would come from the upholstery."

One day, while walking in the country, a young lady wearing slacks, found she was lost. On asking a policeman, she went up to him, with hands in pockets, and enquired nervously: "Could you tell me the way to Oldham, please?" "Yes, miss," replied the policeman. "wear braces, like me."

CROSSFIELD BOYS & GIRLS CALF CLUB

(Prize Winners at 1940 Show and Sale)

The Show and Sale of 16 prime grain fed Baby Beef will be held on Friday, July 25th, at the Crossfield Stockyards.

Over \$100, in prize money donated by the Dominion and Provincial Governments and the Club, including \$30, donated by the Alberta Hereford Breeders Association for calves of Hereford breeding.

A Silver Cup donated by Mr. Harvey K. Adams of the Livestock Commission firm of Adams, Wood and Weiller, Ltd with a small replica for the winner.

This class will be judged at 2:30 and sold immediately after.

J. G. Harrison, President H. McPhail, Supervisor
H. May, Secretary-Treasurer

Gossamer Gold

In London to-day there are master craftsmen making gold-leaf one 290,000th of an inch in thickness.

Using an 8lb hammer on a marble bench, they beat out leaf as fragile as gossamer, and it is their boast theirs is the oldest craft in the British Empire; for they can point to gold-leaf on a mummy case in the British Museum dating back to 2,600 B.C.

Seven years ago, the world's biggest makers of gold leaf began research work at their London

headquarters to produce leaf which would lie more evenly. To-day the new material is keeping its British makers busy. They are now sending it out to many quarters of the globe.

The ancient methods are still employed for the gold-leaf used by sign and interior decorators in their gilding of woodwork and of furniture. So, under one factory roof in London to-day, modern craftsmen are using, side by side, methods little changed in thousands of years with others but a few years old.

SEEDTIME and HARVEST

By
Dr. K. W. Neathy
Director, Agricultural Department
North-West Line Elevators Association

Demonstration Plots

Two weeks ago, in this column, the importance of regular visits to experimental farms and stations was stressed. Farmers and others unable to visit government institutions or to spend time enough to become familiar with various crops and varieties will be interested in the plots now being grown by grain buyers of elevator companies associated with this department.

Three hundred and sixty plots, each containing either 40 or 50 varieties, have been sown and are being maintained by grain buyers in the three prairie provinces. The plots with 40 varieties consist of annual crops only. Those with 50 contain, in addition to annual crops, alfalfa, sweet clover, brome grass, crested wheat grass, etc.

In order to secure the greatest profit from crops, it is necessary to grow pure stocks of approved varieties. It is impossible to do this without first becoming familiar with the characteristics and adaptations of all varieties likely to be found as crops in the area. In addition to small grains and well-known forage crops, varieties of corn, sorghum, sunflowers and soybeans have been included. Literature dealing with the characteristics of all varieties may be obtained from the buyers in charge or from this office. These plots will have a special appeal for school classes and junior clubs.

A large green sign beside the road is an invitation to improve your knowledge of farm crops. If you do not know where to find the nearest plot, enquire from the Agricultural Department, The North-West Line Elevators Association, Winnipeg, Manitoba.

Shade for Live Stock

Now that the hot summer days are here, owners of live stock should see to it that shade is provided. This is especially necessary for white-hogs which are susceptible to blistering. If natural shade is not available, stock may be allowed in the barns or sheds during the hot part of the day. A cheap shed made of poles set in the ground supporting a straw roof is very effective and cheap.

A little care in this matter will be repaid by more rapid gains in swine and higher milk production in dairy cows.

Use Care In Marketing Cockerels

At this time of the year many farmers are marketing their older cockerels as broilers and many are making the mistake of sending the best birds to market. The fast feathering, plump, well developed birds should be marked and kept for the final selection of breeders, but unfortunately a large percentage of the farmers are sending these birds to market as they are the first ones ready. Many poultry buyers are working throughout the country and most of men are very competent in picking the best developed birds and all to often they are allowed to do the selecting of the birds which they want and because of of this are taking the cockerels that should be kept for breeders later on, leaving the less desirable type birds as the sole source of breeding cockerels for the following season. Farmers should be careful and do their own selecting rather than to allow dealers to select for them and should begin now to mark the most desirable birds so that these will be on hand in the fall when they make their final selection of breeding males.

It is well to again emphasize the need for farmers to watch for scoldiosis as this is ideal weather for the spread of this deadly disease. On the first signs of blood in the droppings of young birds, the instructions in leaflet No. 31 of the Agricultural Extension Service, Department of Agriculture, Edmonton, should be carried out. Prevention is better than cure.

Handy Man to Have Around

This man, Pte. A. Frost, of Brighton, who is in the Royal Sussex Regiment, is proud of his great strength. He can carry the entire equipment of a three-inch mortar, the heaviest infantry weapon in the British Army. A kindly censor permits the announcement that this means 200 pounds

The Order of the Gun

By authority of the Tommy Gun he's holding, this British soldier "won" an enemy decoration in a skirmish in the African desert, where British and German forces are temporarily stalemated near Tobruk and Solom.

Young Monarch in England

This photo cabled from London shows King Peter II of Yugoslavia (left) being welcomed on his arrival in England Saturday by the Duke of Kent. The Duchess of Kent is King Peter's cousin. They are pictured here aboard a launch after the youthful King's arrival by plane with some of his ministers.

"Funny," said the Canadian visitor to England. "that you have so many baby cars here."
"Funny nothing," said the Englishman. "Isn't this the Mother Country?"

CONTINUED FROM PAGE 1

This is the interpretation placed upon President Roosevelt's Iceland move by officials, press and public of Britain. It may be too optimistic. But I don't think it is.

At any rate, it has been the biggest moral tonic the British and their Allies have had since the war began. Even the passage of the Lease-Lend Bill did not effect the feeling of genuine relief and exhilaration which has followed this action.

As I say, the British people may be expecting too much. But since Mr. Roosevelt offered no corollary explanation along with the action, we can only draw our own conclusions.

Of course, the practical effects of the American move remain to be seen and these will depend entirely upon what the Germans choose to do about it.

HOGS FATTENED ON ALBERTA COAL

Alberta has won renown as the province which grows the finest protein wheat in the world, produces the finest beef in the west, the best coal and the kind of gasoline that powers fighter planes. Now comes the information that Alberta coal surpasses any other as a fattener of pigs. Authority for the statement is Dr. T. Lloyd Jones, provincial government animal pathologist whose modern laboratory is maintained in the Terrace Building in Edmonton. "Alberta coal-fed pigs are fatter and have better bloom than others," he told delegates to the Pacific Northwest Veterinary Medical Association in Vancouver. "Many Alberta farmers have coal outcrops, but others less fortunate buy it like any other feed." He added that Iowa coal failed to fatten pigs. Stressing need for study of swine diseases Dr. Jones said in 1940, 2,420,000 hogs, or 20 percent of the total fattened in Canada, died of various diseases. He said market value of the lost animals would approximate \$36,310,500.

Hot Weather Desserts

Peach Surprise Sherbet

2 cups sugar
1 quart water
1 teaspoon gelatin
2 cups peach pulp
1 lemon and 2 oranges

Boil sugar and water together for five minutes, add the gelatin softened in cold water. When the mixture is cold, add the peach pulp which has been pressed through a sieve, and the juice of lemon and oranges. Freeze.

Orange Refrigerator Cake

1 cup orange juice
1 tablespoon gelatin
1-3 cup sugar
1-2 cup boiling water
12 marshmallows
1-4 cup orange pieces
1 cup whipping cream
24 ladyfingers or sponge cake

Soften gelatin in a quarter cup of the orange juice. Add sugar and boiling water. Stir to dissolve. Add remaining orange juice. While gelatin mixture cool, combine marshmallows cut into bits, and orange pieces. When gelatin begins to stiffen, beat until fluffy. Fold in orange pieces, marshmallows and the whipped cream. Line a pan with waxed paper. Arrange a layer of ladyfingers, rounded side out, or sponge cake on bottom and sides. Pour in filling and chill in refrigerator over night. Unmold and garnish with whipped cream and orange sections.

No Time Out for a Smoke

Women volunteers don't take time out for a smoke while chipping bricks, somewhere in Britain. The bricks have been gathered by salvagers crews and will be used again. The shields pinned up on their foreheads are supposed to cover their eyes to prevent chips from hitting them.
